DETAILED ACTION

1. Claims 1-61 are presented for examination.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to computer-to-computer connection establishing, classified in class 709, subclass 227.
 - II. Claims 16-58, drawn to database structure, classified in class 707, subclass 100.
 - III. Claim 60, drawn to remote server accessing, classified in class 709, subclass 219.
 - IV. Claim 61, drawn to computer conferencing messaging, classified in class 709, subclass 204.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as subscriber database. Invention III has separate utility such as using telephone number as an address for a desired website. Invention II has separate utility such as sending message over the internet to intended recipient. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination

Art Unit: 2154

purposes as indicated is proper. Furthermore, because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III or IV, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Kevin M. Barner, Reg. No. 46,075, on 2/8/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
